ONE-STOP CYBER SOLUTION
How Momentum Z prepares enterprises
for Cyber Essentials mark

CYBER ESSENTIALS

The Cyber Essentials mark is a cybersecurity certification for organisations that are embarking on their cybersecurity journey. It serves to recognise that your organisation has put in place good cyber hygiene practices to protect your operations and your customers against common cyber attacks.

Examples of measures in Cyber Essentials mark:

ASSET
People:
- Equip your employees to be your first line of defence

Hardware & Software:
- Know what hardware and software you have

Data:
- Know what data you have, where they are and who has access to your data

SECURE / PROTECT
- Protect yourself from malicious software

UPDATE
- Update your software

BACK UP
- Back up your essential data

Enterprises seeking Cyber Essentials certification should complement these products and services with additional measures to fully meet the certification requirements.

Enterprises should refer to CSA's website for more information on Cyber Essentials.
